employees.

In the last couple weeks, countless people reached out to ask me questions about Governor Whitmer's executive orders. There's a lot of misinformation out there and that is leading to confusion and frustration for many Michiganders. I have attached a document that addresses this misinformation. This does not answer all COVID19 questions, and I will be working on answering additional questions soon. When our laws are not being followed by our own government, it is up to us to take action. Hopefully the information contained herein will help you know how to do just that.
