Email addresses omitted as some recipients were not government employees.

Too many people simply trust the data reported by the Governor. If what the Governor is saying is true, then the data straight from the CDC and WHO should clearly demonstrate massive COVID19 deaths and huge differences between COVID19 and other common illnesses, like the flu, that create reason for this unprecedented response.

The attached document shows actual screenshots and provides actual URLs for every single fact cited. Not a single secondary source is discussed. So, go ahead and take a look. But you'll find that the CDC explains that the same symptoms we've been conditioned to fear from COVID19 also happen with flu & pneumonia; both flu and COVID19 more seriously affect elderly and people with underlying medical conditions; COVID19 and flu spread the same way. However, flu is actually 55 TIMES more deadly than COVID19 for children, and more than twice as deadly than COVID19 overall. So despite "analysis of mortality data allowing dissemination of critical information to the public," the public has been given nothing but misinformation purposely designed to breed fear, and subsequently, compliance with entirely unnecessary stay at home orders and other infringements on our fundamental, Constitutional rights.

As you all are taking in the terms of the Governor's newest stay-at-home order, please keep in mind that compromise on various elements of this "emergency" response is not necessary OR justified when the facts upon which this response is based have been gross misrepresentations of the truth - the very truth reported by the CDC and WHO.

Sincerely, and forever your advocate for freedom and the truth,

*Katherine Henry*
